[enquiry@shimaseiki.com.hk](mailto:enquiry@shimaseiki.com.hk)

The New Needle-Bed Washing Machine H2G JUNIOR is an innovative machine made of stainless steel, allowing users to clean the needle-beds of any flat-knitting machines of any brand.

One of the strengths of H2G is the software: intuitive, easy-to-use and is equipped with a system that can detect the position and size of the needle-bed automatically, allowing an automatic management of the entire washing cycle.

Regardless the gauge of the needle-bed, the washing and drying process only takes about 20 minutes to complete (process time varies depending on the soil level).
